

PRODUCT OVERVIEW

Leased Initiative

Landlord and tenant management for the full lease lifecycle — from sign-up and approvals to signed leases, rent, and maintenance.

Leased Initiative is a dual-sided rental operations app. Landlords run properties, applicants, lease agreements, payments, and maintenance alerts from a studio workspace. Tenants use a portal to apply, sign leases, pay rent and deposits, share files, request maintenance, and follow their timeline.

This document describes exactly what the product does today, based on the live product surfaces: welcome carousel, onboarding tour, and in-app workflows.

Who it serves

- **Landlords / property managers**

Manage rentals, invite or discover tenants, draft and finalize leases, track official tenants and payment status, message overdue renters, and review maintenance alerts.

- **Tenants**

Apply to a landlord (by invite or public discovery), review and sign leases, pay deposits and rent through PayPal, Stripe, or Square, upload documents, request maintenance, and track due dates and milestones.

Core lease lifecycle

The product follows tenants from first contact through an active lease:

1. Tenant finds the landlord (Public Discovery) or opens a one-time invite link/code (Invite-Only).
2. Tenant confirms rental details or starts an application: choose company, address, occupancy preference, and (for furnished homes) bed/room.
3. Applicant appears under Waiting to Connect with occupancy preference tags and roommate-invite counts.
4. Landlord accepts & drafts a lease !' Pending Tenants (Lease Drafted). Previous replacement, then send — or auto-send drafted leases.
5. Tenant reviews and signs electronically. Deposit invoice is auto-sent with a payment link.
6. Tenant moves to Official Tenants as Awaiting Deposit !' Confirm Payment Co start !' Active during the term.

What landlords can do

Tenants & Waiting (dashboard)

- **Official Tenants**

See signed tenants with lease status tags (Active / Upcoming / Awaiting Deposit) and payment status tags (On Time / Overdue / Deposit Paid / Awaiting Deposit). Use Spreadsheet or Tile view, resize tiles, edit columns, optionally show occupancy tags, and open Tenant Details from a name.

- **Waiting to Connect**

Review new applicants, occupancy preferences (Entire Home, Open to Roommates, Private/Shared Room), and Accept & Draft Lease.

- **Pending Tenants**

Manage drafted/sent leases: Lease Agreement Preview, Download draft, Upload Replacement, Send, optional auto-send, and Change Lease Style to restyle pending agreements from templates without clearing tenant details or forcing re-sign.

Rentals

- **Add and manage properties**

Furnished or unfurnished, pricing by room/person/bed, deposit, utilities, entire-home-only, bedrooms/privacy, bed sizes, total monthly rent, and calculated max occupancy. Color-coded occupancy; expand occupants and open Tenant Details.

- **Views & filters**

Mobile tiles; desktop Tile or Spreadsheet with rental tile size, Edit Columns, and filters by State, Town, and Group (including map radius).

- **Upcoming Openings**

Rows for units becoming available with Send Re-sign Message for current tenants or Generate Invite Code for a new tenant.

- **Invite links**

Send Invite Link: pick property, future lease start, duration, and custom code — texted to the tenant's phone.

Lease agreements

- **Lease drafting & tracking**

Draft, send, and track leases with Sent / Signed status and term progress. Filter by lease status, progress, state, area code, or group. Tile or Spreadsheet view with lease tile sizing and Edit Columns.

- **Lease Agreement Templates**

In Settings, upload a sample PDF/DOC lease style, view a sample with a pending tenant, confirm as default, then Apply to All (or selected leases) to restyle pending agreements while keeping rent, personal info, and signatures.

Payments & messaging

- **Payments board**

Each tile shows unit rent, tenant monthly share (equal roommate split or custom), paid vs remaining, next due date, and status. Resize tiles; filter Overdue Rent, Paid Early, or payment method (Stripe, PayPal, Square).

- **Smart messaging**

Send Message to Tenant from a payment tile with a template or custom note; replies stay on the landlord's phone.

Tenant Alerts & settings

- **Tenant Alerts**

Maintenance requests with required photos land in Tenant Alerts (top nav / Menu) for review and dispatch.

- **Company Profile & Settings**

Company profile, lease import (queue files! Scan! confirm! invite by email), lease default dates/seasons/eras, app style, Public Discovery vs Invite-Only, tour, and bug report.

What tenants can do

- **Tenant portal & application**

Open an invite link/code for a pre-filled confirmation, or Start Application: choose landlord company, available address (furnished status, total rent, cost at full occupancy, utilities), occupancy preference, and furnished bed/room when applicable.

- **Review & sign leases**

Open sent lease agreements, review terms, and sign by drawing a signature. Both parties are notified; deposit invoice appears with PayPal, Stripe, or Square link.

- **Pay rent**

See next due date; Pay Rent (or pay several consecutive months when the lease allows) via PayPal, Stripe, or Square.

- **Reminders & documents**

Receive overdue rent texts from the landlord and pay anytime from the portal. Upload files/notes and follow lease milestones on the dashboard timeline (also on Timeline).

- **Request Maintenance**

Pick a household problem, attach a required photo, optionally add a note, and notify the landlord under Tenant Alerts.

Demo mode

Hosts can share an access code or company demo link. From the homepage Quick Access (key icon), enter a code — optionally add a first name to personalize mock messages — confirm Start Demo, and choose landlord or a tenant scenario. Switch POV anytime from bottom-right controls; demo changes are not saved.

At a glance

- **Verify & accept tenants**

Review sign-ups and move applicants into the lease pipeline.

- **Draft & finalize leases**

Generate documents, send for e-signature, restyle from templates.

- **Unified tenant dashboard**

Official, pending, and waiting queues with status tags in one place.

- **Schedule & track payments**

Due dates, balances, overdue focus, and payment methods.

- **Smart tenant messaging**
One-time rent messages; replies stay on your phone.
- **Request maintenance**
Photo-backed tenant requests; landlord alerts inbox.
- **Import property records**
Upload leases, extract details, confirm, invite existing tenants.
- **Track rentals & openings**
Occupancy, availability color-coding, upcoming vacancies.
- **Invite & connect**
Invite links/codes or public discovery by agency name.
