

Leased Initiative

Run the full lease lifecycle – from sign-up and approvals to signed leases, rent, and maintenance.

One dual-sided app. Landlords work in the studio. Tenants work in the portal. Same source of truth.

Tenant Pipeline

Keep every applicant moving – no more “where did they go?”

- Invite by link or one-time code (texted to their phone)
- Public Discovery or Invite-Only – you choose how tenants find you
- Waiting to Connect → Pending → Official, with clear next steps
- Accept & Draft Lease in one move
- Occupancy tags: entire home, roommates, private or shared room
- Student or Standard renter tags when applicants choose a category
- Add tenants manually or send invite shortcuts from the dashboard
- Lease Complete prompts Request Key Return within your grace period
- Archive finished leases to Past Tenants – or delete when you’re done

Rentals & Portfolio

Your addresses, beds, and openings – organized like inventory.

- Add rentals as Student Housing or Standard Rental, then furnished status, pricing, deposits, and utilities
- Max occupancy from beds; total rent and full-occupancy cost for applications
- Color-coded occupancy: open beds vs. full homes at a glance
- Expand a rental to see who’s there; open Tenant Details from a name
- Assign tenants to bedroom and bed
- Take Off Market to gray out a unit without deleting it; View Off-Market Rentals beside Map
- U.S. portfolio Map with a pin for every rental – Define Group by pins or radius
- Filter by state, town, and Groups; sort by distance from a place
- Tile or Spreadsheet View, with editable columns and tile size
- Upcoming Openings: vacant units and leases ending soon
- Send Re-sign Message or Generate Invite Code from each row

Lease Agreements

Draft, send, sign, restyle – without losing the paper trail.

- Draft from Accept & Draft Lease or your default template
- Preview, download, upload a replacement, then send when ready
- Optional Auto-send from Pending Tenants
- Tenants review and sign with a drawn signature
- Sent / Signed status and term progress on every agreement
- Upload PDF or Word templates; Confirm as default
- Apply a new style to pending or official tenants – details and signatures stay intact
- Seasonal options, custom lease eras, payment terms, and footers
- Key-return wording and tenant-photo clause from Preferences carry into drafts
- Import existing leases → Scan → Add to Official Tenants or Confirm to Pending

Payments & Money Flow

Deposits, rent, balances, and overdue – all in one place.

- Deposit invoice and payment link auto-appear after signing
- Pay with PayPal, Stripe, Square, or Zelle
- Connect a Zelle email or phone in Company Profile for guided portal pay
- Payment Status shows Deposit Paid with the processor logo
- Confirm Payment Complete: Awaiting Deposit → Upcoming → Active
- Track unit rent, roommate share, balance, and next due date
- Filter by Overdue Rent, Paid Early, or payment method (including Zelle)
- Tenants pay anytime – including months upfront when allowed
- Overdue tag jumps straight to that tenant's overdue payments

Outreach & Reminders

Nudge overdue rent without leaving the app – replies stay on your phone.

- Send Message to Tenant from Payments with templates or your own copy
- Overdue rent messaging that keeps the conversation on SMS
- Client Automation for overdue rent and lease milestone nudges
- Tenant alerts by email and in-portal when something needs attention

Maintenance, Inspections & Alerts

Photo in. Problem clear. Inspection on record. Dispatch ready.

- Tenants Request Maintenance with a required photo and optional note
- Move-in / move-out Condition Reports – required or optional, with due windows
- Tenants rate rooms and fixtures, add notes or photos, and submit electronically
- Requests and condition reports land in Tenant Alerts
- Assess repairs and review inspection checklists from one queue

Tenant Portal

Apply, sign, pay, share, and stay on schedule – from one home base.

- Start Application: landlord, address, furnished bed/room, roommate preference, optional category
- Or join with an invite link/code and a pre-filled form
- Dashboard: rent due dates, Pay Rent, leases, and deposit invoices
- Review and sign lease agreements in-portal
- Pay with PayPal, Stripe, Square, or Zelle (mark Zelle sent for landlord confirm)
- Complete Condition Reports on move-in and before move-out when required
- Share files and short notes with your landlord
- Follow lease milestones on the project timeline
- Property details with housemates and Extra Bedroom Available invites
- Choose Style and manage My profile from Menu
- Restart the product tour anytime

Views, Filters & Clarity

See what matters – hide what doesn't.

- Spreadsheet or Tile View for tenants, leases, rentals, and payments
- Edit Columns: rearrange, hide, or restore fields
- Filter Official Tenants by lease progress, tenant type, and building type
- Filter leases by status, progress, state, area code, or group
- Show Arrangements adds an Arrangement column beside Tenant (bedroom roster with occupants or Vacant; Sole Tenant / Co-Tenant; Open to Roommates)
- Lease duration, dates, and deposit method stay visible – no hover required
- Highlight last import after bringing in existing leases
- Live Updates quietly refreshes the app when a new build is ready
- Mobile-friendly tiles; Display Settings on larger screens

Company, Settings & Style

Set the defaults once. Run the portfolio every day.

- Company Profile: name, rental and renter counts, Past Tenants (Archived)
- Receive Zelle: save the email or phone tenants should pay
- Automatic key-return notifications, Require Tenant Photo, and Require Condition Report
- Business Information for lease headers and contact details
- Lease Defaults and Lease Agreement Templates in one Settings hub
- App Style previews that apply instantly to the landlord studio
- In-app tour with section jump bar – restart from Menu anytime
- Demo mode with host access codes and landlord/tenant POV switching (changes aren't saved)

AT A GLANCE – THE LIFECYCLE

Stage	What happens
Sign-up	Tenant applies or claims an invite
Waiting	Landlord reviews and accepts
Pending	Lease drafted, previewed, sent
Signed	Drawn signature locks the agreement
Official	Deposit invoice out; confirm when paid
Active	Rent schedule, payments, and timeline live
Inspect	Condition reports on move-in and before move-out
Alerts	Maintenance, inspections, and overdue outreach stay in view

BRAND VALUES

Clear – Status and next steps stay visible.	Fair – Both sides share the same information.
Practical – Import leases, track overdue rent, message in place.	Accountable – Signatures, inspections, and payments leave a trail.
Calm – Clean UI, focus on the work.	

Leased Initiative – dual-sided rental operations for landlords and tenants.

Lift any section for decks, one-pagers, landing pages, or sales threads.
